WV: Green Acres Farm Grown/locally sourced			WV: Availability is Limited if Locally Sourced				X: Out-Of-State Sourced					

*These fruits we do not grow and once grown locally are sourced by a trusted local farm

(): Highly perishable and primarily sell at Bridgeport/Clarksburg/WVU Medicine Farmers Markets

Please keep in mind that harvest times will vary depending on the weather conditions, insect infestation, disease, natural damage, etc. These are estimated times of the year we should expect local produce. We have an advantage of growing some produce within our greenhouse to get some items earlier (**limited & would be distributed to Bridgeport/Clarksburg/WVU Medicine farmers markets first until becomes abundant**); However, we do grow a substantial amount of produce outdoors in our fields which could affect actual harvesting times.
